Scale Control R

The descaling system from Quooker

The Scale Control R has been developed to lengthen the lifespan of your Quooker. This tank reduces the hardness of the water in order to prevent limescale build-up in the tank, while also improving the taste of the water. This extends its lifespan and improves the taste of the water.

The Scale Control R consists of a filter tank and a cartridge, which is inserted into the tank. This cartridge softens the water that flows through it. It must be replaced after a certain period of time, which depends on the mains water hardness and how much boiling water is used. The Scale Control R is installed between your main water supply and your Quooker system.

The supplied Scale Control Meter will start to beep when the cartridge needs to be replaced. You can snooze the alarm, and easily order a new cartridge via quooker.co.uk. The old cartridge must be returned to Quooker.

Specifications

Height:	420 mm
Diameter:	130 mm
Minimum working pressure:	2 bar
Maximum working pressure:	8 bar

Prices

Scale Control R starter set:	£ 245
Scale Control R cartridge:	£ 90

Total hardness (°dH)	* Cartridge lifespan (in months)		
Mains water	PRO3 B / PRO3 E	PRO7 E	COMBI E
10	37	16	14
11	33	14	12
12	30	13	11
13	28	12	11
14	26	11	10
15	24	10	9
16	23	10	9
17	22	9	8
18	20	9	8
19	19	8	7
20	18	8	7

* The cartridge lifespan is based on the average consumption of Quooker water for each type of Quooker tank: PRO3 B and PRO3 E tank, 3 litres/day; PRO7 E, 7 litres/day; COMBI E, 8 litres/day.
